

New Daily Seaplane Service to Connect Vancouver and Seattle

Harbour Air and Kenmore Air will add new direct flights starting April 26, 2018

Thursday, April 5, 2018, VANCOUVER, B.C./SEATTLE, WA— Harbour Air and Kenmore Air announced a new seaplane service today between downtown Vancouver and downtown Seattle beginning on April 26, 2018. The new route will help connect the two cities and bolster greater opportunities to collaborate in the Cascadia region for business, research and tourism.

“We are thrilled to expand our relationship with Kenmore Air to launch this new international route that will enable people to fly between downtown Vancouver and downtown Seattle in one hour,” said Randy Wright, President of Harbour Air Seaplanes. “This daily service will connect the Cascadia Corridor and be an important service for business and tourism.”

The new service brings together Harbour Air and Kenmore Air, two of the largest and most respected seaplane operations in the world. They have become a vital part of the Cascadia Corridor’s transportation infrastructure, collectively transporting more than 550,000 passengers a year. Kenmore currently operates daily seaplane service between Seattle and Victoria, B.C.

“With approximately 20,000 annual passengers currently traveling between Seattle and Victoria, we’re confident this new route will support the growing demand for further cross-border travel,” said Todd Banks, President of Kenmore Air. “Increasing cross-border collaboration has been top of mind for government, technology and business leaders alike, and we believe this route provides a fast, convenient and much needed solution.”

“This new direct seaplane route between Seattle and Vancouver, B.C. will be an important link in connecting the Cascadia Innovation Corridor,” said Brad Smith, Microsoft President. “This association between two historic Pacific Northwest companies will accelerate cross-border business and collaboration for the entire region.”

The new seaplane service will offer daily flights between Vancouver’s Coal Harbour and Seattle’s Lake Union, and will include additional air service to Kenmore Air’s Seaplane Base on Lake Washington.

Flight times and booking information is available at www.harbourair.com/seattle and www.KenmoreAir.com/destinations/Vancouver.

About Harbour Air Seaplanes

Founded in Vancouver in 1982, Harbour Air has grown from two small seaplanes into North America’s largest seaplane airline. The Harbour Air Group, consisting of Harbour Air Seaplanes, Whistler Air, Salt Spring Air and Tantalus Air, today has more than 50 aircraft, servicing more than 450,000 passengers each year, including commuters and tourists throughout coastal BC. In 2007, Harbour Air became North America’s first fully carbon neutral airline, offsetting 100% of its carbon footprint. For more information, visit www.HarbourAir.com.

About Kenmore Air

Kenmore Air was founded in 1946 with one airplane and a single hangar, and has grown to become a global leader in seaplane operations, maintenance and construction. Kenmore Air has more than 50 pilots on staff

and flies a scheduled service to more than 45 destinations, landing passengers on lakes, harbors and tarmac throughout the US and Canadian northwest. For more information, please visit www.KenmoreAir.com
